PORTFOLIO OBJECTIVE

The investment objective of the Veritas Canadian Equity Fund is to provide Unitholders with long term capital growth, earning enhanced risk-adjusted returns relative to the S&P TSX Composite Total Return Index by investing in a portfolio comprised primarily of the securities of Canadian companies.

WHY INVEST WITH US

- Driven by award winning research
- High-conviction concentrated portfolio
- Low market correlation
- Index and sector-agnostic
- Low turnover portfolio
- Strict risk management

INVESTMENT STRATEGY

The Fund invests primarily in Buy-rated securities recommended by Veritas Investment Research Corporation (VIR), based on VIR's forensic-accounting based research. The balance of investments consists of securities identified by the portfolio management team as underpriced.

Securities are selected based on their potential for long term capital appreciation, using bottom-up fundamental analysis and a strict review of accounting and disclosure practices to identify companies with defensible competitive advantages and the ability to generate meaningful cash flows.

The Fund restricts its equity investments to long positions in North American listed issuers and may invest up to 10% of its portfolio in the securities of U.S. issuers. Portfolio concentration and risk are managed to minimize volatility and no single position will represent more than 10% of net assets. The Fund may use derivatives such as futures, options, warrants and swaps for hedging purposes to protect against losses or reduce volatility resulting from changes in interest rates, securities values or exchange rates, however notional exposures are generally small and never more than 5% of net asset value.

ABOUT VERITAS ASSET MANAGEMENT

Veritas Asset Management (VAM) is an independent, employee owned, research-driven investment manager. VAM sources its investment ideas from Veritas Investment Research Corp. (VIR), an award-winning, independent equity research organization whose fundamental analysis is based on forensic accounting principles.

After studying the fundamentals and selecting ideas, the portfolio managers at VAM overlay a factor-based risk management strategy. This approach allows VAM to select a portfolio of names and individual weights that, when combined, are designed to minimize risk. VAM is sector agnostic and takes concentrated positions based on each company's relative risk/reward characteristics.

Together, VAM and VIR offer a unique investment solution that diversifies and adds value to investor portfolios.

COMMENTARY

Class F of the Veritas Canadian Equity Fund generated a 1.7% return in June versus a 3.4% return for S&P/TSX Composite index, bringing our year-to-date return to 2.0% versus 5.7% for the index.

The Fund's position in **Bombardier Inc. (TSX: BBD-B)** was the largest contributor to fund performance in June. S&P Global upgraded the company to a B issuer rating, citing its growing free cash flows and expected deleveraging over the next twelve months. With a strengthening balance sheet and steady progress on expanding its aftermarket business, **BBD** continues to offer an attractive investment case.

The Fund's position in **SNC Lavalin Group Inc. (TSX: SNC)** was the second largest contributor to fund performance in June. The company remains on track to meet or exceed the revenue and EBIT targets it set out for the 2022 to 2024 period, albeit with weaker free cash flows and slower deleveraging. With prior lump-sum contract losses moving into the rearview, we expect **SNC** to close its valuation gap versus peers.

Our goal is to buy the best companies in sectors where we identify positive investment catalysts, while avoiding poorly positioned companies in challenged industries. We evaluate each company's ability to navigate good and bad economic environments, looking at the sustainability of cash flows; balance sheet strength; financial reporting transparency and governance.
