Minimum Investment	\$1,000 initial / \$500 subsequent
Firm AUM	\$29.2 million
Employee AUM ¹	\$2.4 million
Volatility Risk Profile	Medium
Distribution Frequency	Annually if any

PORTFOLIO OBJECTIVE

The investment objective of the Veritas Canadian Equity Fund is to provide Unitholders with long term capital growth earning enhanced risk adjusted returns relative to the S&P TSX Composite Total Return Index by investing in a portfolio comprised primarily of the securities of Canadian companies.

WHY INVEST WITH US?

- Driven by award winning research
- High-conviction concentrated portfolio
- Low market correlation
- Index and sector-agnostic
- Low turnover portfolio
- Strict risk management optimization process

THE PORTFOLIO PRIMARILY INVESTS IN

The Fund will invest primarily in the securities of companies included on the V-List Model Portfolio as prepared by Veritas Investment Research Corporation (VIR).

The V-List was launched by VIR in 2004. The V-List is a concentrated model portfolio of between 12 and 25 companies that comprise VIR's best investment ideas. The fund is systematically optimized to minimize volatility and maximize performance relative to passive investing.

Companies are selected based on their potential for long term capital appreciation, using bottom-up fundamental analysis and a strict review of accounting and disclosure practices to identify companies with defensible competitive advantages and the ability to generate meaningful cash flows.

ABOUT VERITAS ASSET MANAGEMENT

Veritas Asset Management (VAM) is an independent employee owned research driven investment manager. VAM was founded on the belief that superior research leads to better investment decisions. VAM sources its investment ideas from Veritas Investment Research Corp. (VIR), an award-winning independent equity research organization whose fundamental analysis is based on forensic-accounting principles.

Once ideas are selected, the next step in building a VAM portfolio is risk management. After studying the fundamentals, the portfolio managers at VAM overlay a factor-based risk management strategy. This approach allows VAM to select a portfolio of names and individual weights that, when combined, are designed to minimize risk. VAM is sector agnostic and takes concentrated positions based on each company's relative risk/reward characteristics.

Together, VAM and VIR offer a unique investment solution that diversifies and adds value to investor portfolios.

JUNE 2020: DON'T LOOK DOWN

Putting the market's year-to-date performance into historic perspective illustrates just how volatile the start to 2020 has been in Canadian markets. While the first quarter of 2020 saw a decline of 20.9% making it the S&P/TSX Composite's third-worst quarter over the period from 1956 to present, the second quarter of 2020 saw the seventh-best performance recorded over the same time frame with a return of 17.0%. Overall, the first half of 2020 saw the S&P/TSX Composite decline by 7.5%, with Financials and Energy sectors contributed -5.7% and -5.2%, respectively. In fact, the only two positive sectors were Materials and Technology, contributing +2.4% and +4.0% respectively. Of the +4.0% Technology contributed, Shopify Inc. (SHOP) accounted for 3.8%.

Our goal is to buy companies best positioned to capitalize on their industry's tailwinds at discounts to their intrinsic values and avoid poorly positioned companies in challenged industries. During H1-2020, our performance was driven by overweight positions in the consumer staples in anticipation of a recessionary crisis. Most noteworthy contributors to Fund performance included Metro Inc (MRU), Maple Leaf Foods (MFI), and SPDR Gold shares (GLD).

April, May and June have been markedly different than Q1. Many stocks that were down most through Q1, surged most through Q2 as investors have shown a willingness to ignore current economic pressures and dire earnings forecasts. Central bank deficits for 2020 as a percentage of GDP are expected to be significantly higher than in any one year during the Great Depression of the 1930's. We are concerned that investors are chasing the recovery believing that 2021 earnings will return to 2019 levels are behaving like the Looney Tunes' famous Wile E. Coyote who was held in Suspended Animation when he chased the Road Runner over the cliff...until he looked down.

Given deteriorating household and corporate balance sheets, we expect consumer discretionary and financial services companies to remain challenged and face a significant shock when the government stimulus programs expire in the coming months. Top contributors to Fund performance in June were Maple Leaf Foods (MFI) and United States Oil Fund (USO).

We continue to prefer businesses with strong balance sheets, free cash flow and the ability to endure periods of hardship. We will participate in the central bank driven rally but remain cautiously positioned given the uncertainty of the current economic recovery.

DISCLOSURES

The information contained herein is for general information purposes and does not constitute a solicitation for the purchase or sale of securities. The full details of the Fund, its investment strategies and the risks are detailed in the Fund's current simplified prospectus, annual information form, and fund facts document, copies of which may be obtained from Sedar, your dealer, Veritas Asset Management Inc. ("VAM") or at Veritasfunds.com. Please read the prospectus before investing. Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. All performance data assume reinvestment of all distributions or dividends and do not take into account other charges or income taxes payable by any unitholder that would have reduced returns. The performance of the Fund is not guaranteed, unit values change frequently and past performance may not be repeated. Performance is presented in Canadian dollars, unless otherwise stated, and is net of fees of Series F units of the Fund. VAM is an affiliate of Veritas Investment Research Corporation ("VIR"), which produces and issues independent equity research regarding public issuers to investors and other capital markets participants. VAM is a client of VIR and receives research reports from VIR at the same time as VIR's other clients. VIR and VAM have implemented policies and procedures to minimize the potential for and to address conflicts of interest, which are available upon request.

1. Employee AUM includes all parties related to the Manager in all series or classes of all Veritas Funds, as of June 30, 2020.
2. Source: Refinitiv, Veritas Asset Management estimates, for period ending June 30, 2020. F Series Inception Date: May 1, 2018. Benchmark is the S&P/TSX Composite Index. The S&P/TSX Composite Index is a capitalization-weighted index that represents some of the largest float-adjusted stocks trading on the Toronto Stock Exchange. Veritas Canadian Equity Fund draws its ideas from constituents in the index, but differs in its weighting of securities.
3. Beta (observed beta) $\beta_{i,f}$ based on historical relationship between fund return (F) and index (I) performance. $\beta_{i,f} = \text{Cov}(R_i, R_f) / \text{Var}(R_i)$ where R_i is daily index return, R_f is daily fund return.
4. Volatility is expressed in terms of historical annual volatility. Historical monthly volatility is measured by the standard deviation of monthly returns. Historical Annual Volatility is measured by annualizing monthly data.
5. Source: Bloomberg, for period ending June 30, 2020. Portfolio weights refer to end of day weights of last official reporting period.
