**PORTFOLIO OBJECTIVE**

The investment objective of the Veritas Canadian Equity Fund is to provide Unitholders with long term capital growth, earning enhanced risk-adjusted returns relative to the S&P TSX Composite Total Return Index by investing in a portfolio comprised primarily of the securities of Canadian companies.

**WHY INVEST WITH US**

- Driven by award winning research
- High-conviction concentrated portfolio
- Low market correlation
- Index and sector-agnostic
- Low turnover portfolio
- Strict risk management

**INVESTMENT STRATEGY**

The Fund invests primarily in Buy-rated securities recommended by Veritas Investment Research Corporation (VIR), based on VIR's forensic-accounting based research. The balance of investments consists of securities identified by the portfolio management team as underpriced.

Securities are selected based on their potential for long term capital appreciation, using bottom-up fundamental analysis and a strict review of accounting and disclosure practices to identify companies with defensible competitive advantages and the ability to generate meaningful cash flows.

The Fund restricts its equity investments to long positions in North American listed issuers and may invest up to 10% of its portfolio in the securities of U.S. issuers. Portfolio concentration and risk are managed to minimize volatility and no single position will represent more than 10% of net assets. The Fund may use derivatives such as futures, options, warrants and swaps for hedging purposes to protect against losses or reduce volatility resulting from changes in interest rates, securities values or exchange rates, however notional exposures are generally small and never more than 5% of net asset value.

**ABOUT VERITAS ASSET MANAGEMENT**

Veritas Asset Management (VAM) is an independent, employee owned, research-driven investment manager. VAM sources its investment ideas from Veritas Investment Research Corp. (VIR), an award-winning, independent equity research organization whose fundamental analysis is based on forensic accounting principles.

After studying the fundamentals and selecting ideas, the portfolio managers at VAM overlay a factor-based risk management strategy. This approach allows VAM to select a portfolio of names and individual weights that, when combined, are designed to minimize risk. VAM is sector agnostic and takes concentrated positions based on each company's relative risk/reward characteristics.

Together, VAM and VIR offer a unique investment solution that diversifies and adds value to investor portfolios.

**COMMENTARY**

Class F of the Veritas Canadian Equity Fund generated a -3.4% return in May versus a -5.0% return for S&P/TSX Composite index, bringing our year-to-date return to 0.3% versus 2.3% for the index.

The Fund's position in **Element Fleet Management Corp. (TSX: EFN)** was the largest contributor to fund performance in May, as the company's first quarter reported higher originations and vehicles under management, as well as robust syndication volumes. **EFN** continues to benefit from increased outsourcing and fleet renewal activities.

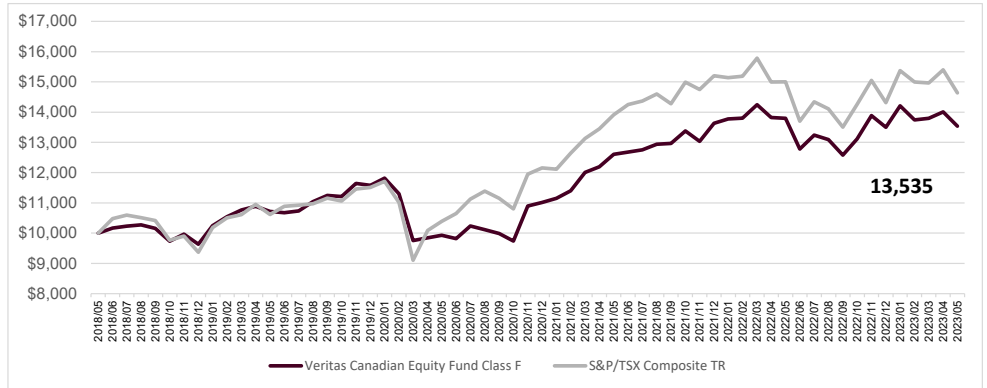

The Fund's position in **TransAlta Corp (TSX: TA, NYSE: TAC)** was the second largest contributor to fund performance in May. **TA** nearly doubled its first-quarter Adjusted EBITDA year-over-year, on lower downtime, higher electricity production and stronger Alberta power prices. **TA** continues its successful shift towards renewables, which represented 25% of its electricity production and 38% of its EBITDA in the quarter.

Our goal is to buy the best companies in sectors where we identify positive investment catalysts, while avoiding poorly positioned companies in challenged industries. We evaluate each company's ability to navigate good and bad economic environments, looking at the sustainability of cash flows; balance sheet strength; financial reporting transparency and governance.
